Professional Summary

Creative and performance-driven **Full Stack Developer** with hands-on experience building scalable, data-driven web applications using **React.js, TypeScript, Node.js, and modern UI frameworks like Tailwind CSS and ShadCN**. Skilled in developing responsive interfaces, implementing backend logic, and creating complete product flows from authentication to dashboard systems. Adept at building real-world tools including **SaaS dashboards**, POS systems, and Stripe-integrated applications while maintaining clean architecture and smooth user experience. Actively seeking a full-time role to build impactful, production-ready solutions in fast-paced environments.

Education

MNS UET Multan

Bachelor of Computer Science GPA: 3.3/4.0

Skills

- Languages:** JavaScript (ES6+), TypeScript (basic), HTML5, CSS3
- Frameworks & Libraries:** React.js, Next.js, Tailwind CSS, Redux Toolkit, ShadCN, Framer Motion, Material UI
- Backend:** Node.js, Express.js
- Databases:** PostgreSQL, SQLite, Supabase
- APIs & Integrations:** REST APIs, Stripe Connect (OAuth), Clerk Auth, OpenAI API
- Tools & Platforms:** Git, GitHub, Vite, Firebase, Supabase, Postman
- Deployment & DevOps:** Vercel, Netlify, Render, VPS (Contabo), cPanel, aaPanel, Linux Terminal
- UI/UX Expertise:** Responsive Design, Component Architecture, Dark Mode, Animations, Dashboard UI Systems

Projects

1. Freelancer Nexus – Client & Invoice Management Dashboard

Tech: React, TypeScript, Tailwind CSS, Zustand, Stripe Connect, Express

A responsive freelancer dashboard for managing clients, invoices, projects, and Stripe payments, built with full UI logic and real-world features.

- Built a responsive dashboard with client cards, invoice tracking (Paid, Due, Overdue), and project workflows (To-do → In Progress → Completed) using modular UI and Zustand state.
- Integrated Stripe Connect onboarding with secure OAuth flow, Express backend token exchange, and connected account display in the settings page.
- Designed full notification toggles, payment method forms (Stripe/PayPal), and a clean dark UI with smart toasts, Zod validation, and seamless page-to-page logic.

2. HostelGlide – Hostel & Hotel Management System

Tech: React, TypeScript, Supabase, Clerk, Tailwind CSS

A modern hostel/hotel booking platform with full user flow, from login to booking confirmation.

- Room listings, guest selection (adults/children), date pickers
 - Dark mode support, animations via Framer Motion
 - Realtime Supabase sync, "Book Now" logic with booking history
-

3. Ishvine Hub – Real Estate Management Dashboard

Tech: React, TypeScript, Next.js, Tailwind CSS, React Query, PostgreSQL

A centralized dashboard for managing real estate operations including leads, customers, properties, and financial tracking, built for high-performance workflows and real business use.

- Built multi-module dashboard (Leads, Customers, Properties, Tasks, Finance) with optimized data fetching and structured UI flows for real estate operations
 - Implemented fast-loading tables, reusable components, and clean state handling using React Query for efficient data management
 - Designed scalable UI system with role-based flows, analytics sections, and responsive layouts for handling complex business data
-

4. POS – Inventory & Billing System

Tech: React, Node.js, SQLite, Tailwind CSS, Vite

A local shop point-of-sale system for managing inventory, sales, and billing with real-time calculations and structured UI flows.

- Built billing system with carton/box logic, dynamic pricing, and accurate total calculations with discounts and tax handling
 - Developed inventory and sales tracking with structured product management and stock validation logic
 - Designed fast, keyboard-friendly UI with responsive layout and clean workflow for real shop usage
-

Core Strengths

- Building fast, animated frontend apps with clean UI/UX
 - Comfortable in TypeScript, Tailwind, Supabase-based systems
 - Can wire up logic from backend to pixel with full flow
 - Familiar with auth flows (Clerk), form validation (Zod), and data visualization
 - Good at building MVPs solo or in team sprints
-

Experience

Freelance Developer (Remote Projects)

August 2023 – Present

- Built portfolio websites and internal tools for clients
- Integrated APIs, dashboard logic, and animation flows
- Collaborated with teams using GitHub, managed deployment with Vercel

Internships

Frontend Intern – *CodeAlpha*

June 2025 (1 Month)

- Built UI components using HTML, CSS, and JavaScript
- Delivered static frontend tasks and page templates

Frontend Intern – *Octanet Services Pvt Ltd*

Aug 2024 – Sept 2024 (1 Month)

- Contributed to UI design and layout implementation
 - Completed frontend assignments with design precision
-

Certifications

- 1. Foundations of Project Management** – Google / Coursera
 - 2. Full Stack Web Development Bootcamp** – Udemy (Frontend-focused)
 - 3. Responsive Web Design** – freeCodeCamp
 - 4. JavaScript Algorithms & Data Structures** – freeCodeCamp
-

Bonus Traits

- Fast learner with the ability to quickly adapt to new technologies, tools, and project requirements
 - Strong attention to detail with focus on clean UI, responsive layouts, and smooth user interactions
 - Combines design thinking with structured logic to build practical, user-focused solutions
 - Comfortable working independently or collaborating in fast-paced, sprint-based environments
 - Consistent builder mindset focused on shipping real products and continuously improving
-
